### AMPLIFICATORE COMBO PER CHITARRA 40 WATT

Il Mustang™ II contiene 24 modelli estremamente accurati di amplificatori con toni che vanno dai brillanti suoni Fender fino alle scandalose distorsioni del metal moderno. Si connette facilmente al tuo computer per aggiungere altri modelli di amplificatori. I 24 amp singoli sono disposti in tre banchi di 8 (cioè, tre '57 Deluxe™ preset, tre anni '60 Brit preset, ecc.) Questi preset sono facilmente richiamabili con la manopola "preset" (o dal pedale o dal computer). Ruotate questa manopola per scorrere ciascuno dei tre banchi di preset, che sono indicati sul pannello di controllo da colonne LED colorati ambra, verde e rosse. La rossa e la verde sono per la creazione di preset, i banchi ambra possono essere modificati solo con Fender FUSE (applicazioni software fender)
