

## BEHRINGER V-verb Pro REV2496

Produttore : Behringer

Cod.Art. : 1119

### PROCESSORE EFFETTI

The V-VERB PRO REV2496 is a reference-class reverb modeler that simulates some of the world's most renowned reverb processors. It draws its strength from two independent effects processors that can be accessed via both analog and digital connectors. It also features 8 high-end reverb algorithms modeled after world-class reverb processors plus additional high-quality modulation effects from X-over Delay to Chorus/Flanger plus stereo Compressor. Its high-quality 24-bit/96 kHz A/D & D/A converters plus full 96 kHz operation with both effects processors (all 4 channels!) guarantees absolute high-end performance.

There are 10 different routing configurations for flexible assignment of analog and digital signals to both stereo engines. A full-featured digital interface with AES/EBU In/Out, optical S/PDIF In/Out, Wordclock In and MIDI capability allow flexible integration with other digital equipment. An ultra high-resolution SHARC® processor with 32-bit internal signal processing assures the ultimate in sonic resolution. Yet, navigating the REV2496 is intuitive and easy, with soft push/turn encoders, a big preset wheel, high-resolution LCD display and an additional TAP button for delay times. Direct access to 4 effect parameters makes editing easy and comfortable, and you can intuitively edit up to 30 parameters using a specially designed graphic mode. Separate ROM

and user preset banks put a total of 400 presets at your fingertips—and open architecture allows future software updates via MIDI. Of course, you also get balanced inputs and servo balanced outputs with gold-plated XLR and ¼" TRS connectors.

### Caratteristiche

- Il REV2496 è un modellatore riverbero che simula i più rinomati processori riverbero, 4 canali, con convertitori A/D e D/A a 24-bit/96 kHz.

## BEHRINGER V-verb Pro REV2496

- 8 algoritmi di riverbero, funzione MIDI, processore SHARC®
- effetti modulazione da X-over Delay a Chorus/Flanger più Compressore stereo
- interfaccia digitale con In/Out AES/EBU , In/Out S/PDIF ottici, In Wordclock
- 10 differenti tipi di routing, accesso diretto a 4 parametri effetti ROM separato, 400 presets

Prezzo : €139,00 IVA inclusa (€113,93 esclusa IVA)
