

## BEHRINGER Ultrabass BX1200

Produttore : Behringer

Cod.Art. : 1125

### AMPLIFICATORE PER BASSO

Looking for a bass combo to cover all of your practice, rehearsal and recording needs? One that will not only deliver awesome sound and incredible low-end punch, but also enough power to compete with

a band? And—if you had your way—one that could also cut it on larger stages with additional speakers? No such thing, you say?

Then check out the BX1200. Our largest ULTRABASS combo combines raw

power with an amazingly flexible 2-channel preamp section and an abundance of professional I/O options rarely found in bass combos, to give you everything you need in a bass combo and then some. Its oversized power supply, along with our revolutionary, DYNAMIZER circuitry and the carefully designed bass reflex enclosure, ensure that the short-circuit proof, virtually indestructible power amp with its two-speed thermo-controlled fan will always deliver to its full capability without sacrificing punch or sound quality. The BX1200's preamp section starts with your choice of active or passive inputs, and goes on to offer incredible tone-shaping power, with separate gain controls for each channel and a 4-band EQ.

Channel two features our switchable and tunable Shape function, which ideally complements the EQ by giving you extra control over those dreaded "nasal" mid frequencies. Both channels also share a built-in ULTRABASS function. Based on our celebrated psychoacoustics units, this subharmonics processor adds ultra-low frequencies to your sound and is tunable and switchable via a front-panel button or the included footswitch. The BX1200 features a custom-made 12" aluminum cone speaker that reproduces your sound

with incredible power, sensitivity and warmth. Should you need extra clout for larger venues, you've got the option of connecting additional speakers and/or power amps. And speaking of connections,

you'll also appreciate the stereo tape I/O, the insert facility for outboard effects or processors (preamp out/power amp in), and the

## BEHRINGER Ultrabass BX1200

tuner and headphone outputs. Not to mention the balanced DI out with XLR connector, perfect for recording or PA applications. Oh, and by the way: the BX1200's innovative wedge shape allows you to use it standing up or tipped back at a perfect floor monitor angle. No such thing? We suggest you stop by your BEHRINGER dealer and test-drive the ULTRABASS BX1200.

### Caratteristiche

- Amp per basso a 2 canali
- 120 W RMS di amplificazione
- Speaker personalizzati 12" con cono in alluminio
