

YAMAHA PSR3000

Produttore : Yamaha

Cod.Art. : 1149

TASTIERA PORTATILE

The PSR3000 is a breakthrough product, plain and simple. It includes many of the stunning features of the Tyros at half the price. It's all there, 128 notes of polyphony, a huge wave ROM including Sweet, Cool and Mega Voices (for the most realistic guitar sounds you'll ever hear). You also get the styles from the Tyros.

Computer connectivity is cutting edge with USB hosting for storage devices like USB Hard Disks and Thumb Drives, a Smart Media card slot and USB MIDI connections. On top of that, Yamaha's new Internet Direct Connection feature allows the PSR3000 to connect directly to the Internet and download content directly via broadband connections. The 320 x 240 colour LCD not only makes the PSR3000 a breeze to use, but has the ability to display scores and lyrics. You can even use the video-out to connect an external monitor or projector.
