

BEHRINGER MX9000 Eurodesk Mixer analogico

Produttore : Behringer

Cod.Art. : 1291

MIXER ANALOGICO

Our largest console features 24 fully inline channels, each with an extensive MIC/LINE and a MIX B/TAPE RETURN path. The MIC/LINE path offers balanced mic and line inputs, an INVISIBLE MIC PREAMP, pad, inserts and a 4-band EQ with two semi-parametric mid-frequency bands, 15 dB of boost/attenuation plus low-cut filter. 6 aux sends are available (pre/post switchable in pairs), plus a pan pot, solo and mute functions, full routing options and 100-mm faders. The MIX B/tape return path features a dedicated 2-band shelving EQ, pan and level controls, mute function and access to aux sends 3 to 6. The master section offers extensive routing and monitoring options plus control of the 8 group busses and stereo main bus. The precise LED meters can display A or B channel paths and various busses. All crucial inputs and outputs are balanced, and the entire console is based on our renowned ULN circuitry for crystal-clear, noise-free audio and musical sound. The external rack-mountable PSU ensures ample headroom and prevents interference.
