

BEHRINGER VMX1000 Mixer per DJ

Produttore : Behringer

Cod.Art. : 1523

MIXER PROFESSIONALE PER DJ

Among professional DJs, certain mixers emerge over time as must-have equipment, and the PRO MIXER VMX1000 is destined to face

such fate. It's a professional 7-channel rack-mount DJ mixer with a BPM counter that is predestined for professional clubbing with its wide-ranging connectivity options and intuitive layout.

The techies will appreciate the super-smooth ULTRAGLIDE faders with

up to 500,000 life cycles and the VCA-controlled crossfader - they yield utmost reliability and smooth audio performance.

BEHRINGER's

awesome XPQ stereo surround effect will give your mix an unmistakable finishing touch, and the adjustable crossfader curve lets you quickly adapt to various mixing styles. But the list goes on: you get a 3-band kill EQ (-32 dB) with EQ on/off switch on stereo channels as well as gain control and precise level meters on each channel. There is also a monitor function with PFL/main balance control & split option and auto-talkover function with separate depth and sensitivity control. The subwoofer output with adjustable x-over frequency and level control is perfect for putting some extra punch to your dance numbers, and you'll never run out of connectivity options with the balanced main and additional zone outputs.

Its extensive array of features is proof positive that even the most discerning DJs will feel right at home taking the VMX1000's helm.

Caratteristiche

- Mixer da DJ a 7 canali, 5 gruppi con ingresso duale a 2 canali mic.
