SOFTWARE EDITING AUDIO

MediaWorks is the all-in-one digital media creator for enjoying, organizing, backing up, and sharing photos, music, video, and data on CDs, DVDs and the Internet. With MediaWorks' fast, easy-to-use interface, everything you want to do is only one click away — all within one program. And with its friendly and informative on-screen guides, you'll be having fun in no time at all.

MediaWorks — PhotoVideo™ slideshows Blend photos and digital video along with music soundtracks and audio commentary to create the ultimate memory of special occasions like weddings, birthdays, vacations, and more. You also can use this unique feature to create powerful business presentations or promotional materials for your band. You can easily synchronize music to transitions using MediaWorks' unique MatchBeat feature.

Build web-ready photo albums Build digital photo albums from PhotoVideo shows in one simple step. MediaWorks will automatically generate thumbnails and index pages — formatted to share on the web or back up on CD/DVD.

MediaWorks — Burn & play video CDs & DVDs Share PhotoVideo™ slideshows by burning them to video CDs and DVDs that will playback on most DVD players. You can also watch video CDs and DVDs on your PC with the included InterVideo WinDVD 4, the #1 software DVD player — included free.

Copy audio & data CDs MediaWorks can make direct, disc-to-disc copies of audio & data CDs on PCs that feature multiple drives. If you only have one drive, not a problem — simply rip the audio CD or copy the data CD to your hard drive, then burn away.

Backup and protect valuable data files MediaWorks provides a simple and integrated interface for burning data CDs and

EDIROL Pyro Plus (MediaWorks) MP3, CD & DVD Maker

DVDs to easily archive important files onto disc. Burn up to 4.7 GB of data on DVD, 700 MB on CD.

MediaWorks— Includes all the great audio features of Pyro Whether you want to make MP3s, burn and share mix CDs of your favorite music, digitize and restore LPs or cassettes, archive important data files, or create backup copies of your favorite CDs, MediaWorks does it all in one easy-to-use application.
