

## YAMAHA I88X mLAN

Produttore : Yamaha

Cod.Art. : 1681

### SCHEDA AUDIO FIREWIRE

There is no more important part of the signal path of your audio system than your mic preamps. That is the reason why we focused on a pristine audio signal path. These microphone preamplifiers were developed by the same engineers who developed our DM 2000 and 01V96 consoles and are the result of years of feedback from world-class engineers and producers. The i88x can be used in an mLAN network as well as a stand-alone Audio/MIDI interface.

### Caratteristiche

- Two DM 2000 quality mic preamps with inserts
- 6 additional line inputs
- 24 Bit / 96 kHz audio interface
- Balanced inputs and outputs
- ADAT I/O supporting 96 kHz (can be used as ADAT converter!)
- SPDIF I/O
- 18 simultaneous audio channels
- 1 x MIDI I/O
- OS 9/Win XP mLAN drivers (OS X under development)
- Can be used as extension for 01x or MOTIF using mLAN16E due to mLAN support as well as a stand-alone Audio/MIDI interface
- Portable 1 unit rack
- Including VST/AU PlugIns worth over 700

Prezzo : €939,00 IVA inclusa (€769,67 esclusa IVA)
