Cod.Art. : 1751

MULTIEFFETTO PER VOCE

The DFX256 is a studio quality and easy-to-use digital multi-effects device. Housed in a 1U chassis, the DFX256 offers 16 digital effects, which are most commonly used by audio professionals such as reverb, delay, flanging, and chorusing effects. True 20-bit A/D and D/A converter and 24-bit digital processing delivers clean, wide frequency audio reproduction. For easy operation, individual effects selection is accomplished with a digital display and two scroll buttons. Each effect further provides 16 variations (a total of 255 effects due to one being blank) to fit various applications and individual needs. A footswitch jack provides hands-free triggering for recording and live event use.
