KIKO100 There is a mix of many different musical influences in Kiko Loureiro's playing style, so he needs a guitar to be well-rounded in order to cover everything he wants to do with the guitar. He and Ibanez worked for a long time, going over many different neck shapes and body shapes before deciding on what works best for him, and nailed it with the KIKO models. ****Product Features**** - 5pc Maple/Walnut neck The 5pc Maple/Walnut neck provides tonal clarity and superior attack. - Rosewood fretboard Rosewood fretboard provides a well-balanced solid tone with a focused mid range. - Jumbo frets with Prestige fret edge treatment The wide and tall fret-type offers a quick response, good articulation when playing chords and clear tone when playing single notes. Prestige Fret Edge Treatment guarantees effortlessly fast playing. - Flamed Maple top / Alder body The Flamed Maple top displays a beautiful wood grain. The Alder body delivers a well-balanced bright tone, enriched resonance and sustain. - DiMarzio® KIKO original pickups Kiko plays a wide range of music, from metal to jazz fusion, and the pickups were designed to reflect this range of sound. The neck and bridge humbuckers have medium output and a balanced sound in terms of frequency response. The single-coil middle pickup is more powerful and warmer-sounding than a typical vintage single-coil in order to balance well with the neck and bridge pickups. - Gotoh® machine heads Gotoh® machine heads provide superior precision, a smooth feel, and excellent tuning accuracy. - Edge tremolo The masterpiece Edge bridge offers exceptional tuning stability, precise intonation adjustment, and playing comfort. - Special Wiring switch on volume control (push/pull) The Special Wiring switch offers more versatility to your sound. - Hardshell case included Ibanez Hardshell case gives extreme protection for your beloved instrument. ****Special Features**** - Scalloped Fingerboard on 19-24th frets For easier high note bending and tapping. - Deep and beveled lower horn scoop It allows better and multidirectional high fret access. - Tilt-in Jack Tilt-positioned output jack on the
