Pearl.

Cod.Art. : 179969

Reference ONE Series Snare Drums are a refined complement to your total drum set sound. Combining an ultra-thin combination of Masterworks-grade North American Maple and Birch, the 5.4mm EvenPly Six Reference ONE shell delivers a warm, resonant quality with heightened top-end pop at the strike. Each snare features a tonally curated hardware selection, including our Mastercast Die Cast Hoop, Swivel lugs, and Glide Lock strainer system. Ultra-Sound "D" type snare wires are used to further increase sensitivity and sizzle by focusing snare tension on the center wires. A more nuanced, near-field playing experience awaits with a Reference Pure snare.
