
PEARL 13x11,13x12 R2 Air L-rod

No image

Pearl.

Cod.Art. : 180050

To attain tonally true sound, every drum would have to be mounted in a floating point at the center of its shell. R2 Air equally balances mounting pressure across two floating points at the top and bottom of each tom. This gives true tonal separation from mounting hardware and enhances sonic output. All mounting hardware is isolated from the shell via the R2 Air's four ResoDisc shock absorption inserts.

Prezzo : €470,00 IVA inclusa (€385,25 esclusa IVA)
