

MARSHALL MG100DFX (MG3)

Marshall
AMPLIFICATION

Cod.Art. : 1892

AMPLIFICATORE PER CHITARRA

This compact, gig-ready, 100W, 1x12" combo is a powerhouse of killer tone. Its two footswitchable channels offer a pair of selectable modes - Clean/Crunch on the Clean Channel and OD1/OD2 on the Overdrive Channel. Each channel has independent tone controls for Bass, Middle and Treble, and the Overdrive Channel also features our critically acclaimed Contour control for tonal versatility. Higher Gain settings on the Clean Channel will yield a healthy, bluesy overdrive, especially when the 'Crunch' mode is selected. This said, when in Clean mode, this channel has bags of headroom which makes high levels of clean performance easily attainable. The Overdrive Channel's OD1 mode is reminiscent of the throaty drive that has made our vintage amps famous, while OD2 is brimming with modern, high gain aggression. The MG100DFX's specially-voiced DFX section offers Chorus/Delay, Delay, Chorus or Flange effects plus a natural sounding digital Reverb with its own individual control. Add in our revolutionary FDD technology, a parallel effects loop (with switchable level and Effects Mix control), custom 12" speaker, CD input, Speaker Emulated Headphone and Line Output plus a Master Volume control, you have a world-beating combo.

Caratteristiche

- Twin footswitchable channels
- Clean & Overdrive
- 2 modes on each channel
- Clean/Crunch on Clean and OD1/OD2 on Overdrive
- Independent tone controls for Bass, Middle & Treble on each channel
