

LANEY B2

Cod.Art. : 2039

AMPLIFICATORE 750W PER BASSO

The B2 combines all the flexibility of the B series pre amp and power and packages it into a highly portable 2 x10" + CD combo. Configured at 600 watts this unit can also be used in conjunction with for example the B115 cabinet to give increased flexibility whilst maintaining portability. Using new power amp technology we have reduced the bulk and weight of the B2 whilst increasing the attack and frequency response of the unit, far beyond anything that has been conventionally available before. B2 combos are finished in Vinyl for the ultimate in cabinet damping and protected with metal corners and punched metal kick grills. Each combo is fitted with castors and a unique easy grip handle.

Caratteristiche
