

## ULTIMATE SOUNDBANK Plugsound Vol.5 World of Synthetizer

 UltimateSoundBank

Cod.Art. : 2130

### VIRTUAL INSTRUMENT

512 patch per un totale di 600 MB di suoni, una collezione impressionante di suoni retrò ed attuali. Tutte le diverse tipologie di preset sono affrontate: attack, flute, voice, tine & bell, bass, organi, vintage synths, pad, filter sweeps, analog brass & leads, digital leads, piano-like, textures, effects and short rezo. C'è più varietà in questa modulo sonoro che nei 2 o 3 synth hardware tra i più recenti combinati assieme. Questo Plugsound mette in luce tutta la flessibilità dell'interfaccia proprietaria UVI.

### Caratteristiche

- Powered by the 32 bit UVI engine: award-winning audio quality
- Save all edited parameters within your current sequence
- Over 10 times more samples than hardware sound modules
