

NATIVE INSTRUMENTS FM7 Sounds Vol. 2

Produttore : Native Instruments

Cod.Art. : 2275

SOFTWARE AUDIO

Professional sound designers and FM synthesis experts developed this collection of presets for immediate use with the FM7 software synthesizer. The 256 included presets were specially designed to benefit from the powerful sound synthesis abilities of this highly advanced FM synthesizer. The presets take full advantage of all of the FM7's great features: envelopes with up to 31 breakpoints, two additional operators, extensive modulation capabilities, dedicated analog style filters, and a comprehensive effects section. The collection covers the full range of FM possibilities from crystalline pads and powerful percussion to innovative synths and looped sequences.

The FM7 SOUNDS VOL. 1 is available as CD ROM at retailers and as

Direct Download in the NI Online Shop.

The booklet provides a list of the sounds with their names, authors, and assigned controllers.

Please note that all newer FM7 full versions now include this FM7 Sound CD ROM without extra costs.

After registering FM7 Sounds Vol. 1 you can download an additional preset bank here...
