

NATIVE INSTRUMENTS FM7 Sounds Vol.1

Produttore : Native Instruments

Cod.Art. : 2276

SOFTWARE AUDIO

The FM7 synthesizer from Native Instruments opens endless possibilities for sound generation by combining an expanded FM architecture, integrated effects, flexible envelopes, and versatile modulators. With FM7 Sounds Vol. 2, Native Instruments offers a brand new preset package for the FM7 that perfectly complements the

FM7 factory library and FM7 Sounds Vol. 1. Professional sound designers and FM-synthesis experts programmed the 256 new sounds in

meticulous detail. The results are extraordinary sounds in all sonic categories - and for all music styles.

The presets are designed to take full advantage of the flexible FM7 synthesis architecture and make use of velocity, mod wheel, aftertouch, and tempo sync for extremely dynamic and flexible sounds.

Widest selection

FM7 Sounds Vol. 2 offers a wide spectrum of sounds:

BANK 1: Synths, Pads, Atmospheres:

From classic to modern synth sounds, including lead synths and chord synths, soft and digital pads, to exotic atmospheric sounds, this bank contains a huge amount of never-before-heard sounds suitable for music, film, and sound design.

BANK 2: Keys, Bells, Effects, Loops, Basses

Dynamic electric pianos, metallic bells, a variety of effect sounds, a big selection of rhythmic drum- and melodic loops, plus powerful synth, acoustic, and electric basses. The rhythmic loops will automatically sync to the project tempo in a host, for perfect integration in any sequencer environment.
