

BEHRINGER Eurolive B1220

Produttore : Behringer
Cod.Art. : 2346

DIFFUSORE PASSIVO

The BEHRINGER EUROLIVE B1220 is an ultra-flexible speaker system for a great range of possible applications, i.e. club gigs, vocal and instrument reproduction in churches, karaoke etc., or as a mid/high system in larger-scale PA's. It provides ultra-clean, brilliant sound even at higher levels with virtually no distortion. Its trapezoidal cabinet design is perfect for cluster formation in larger PA systems. The integrated BEHRINGER HF driver protection reduces the risk of damage to this crucial component. Professional quality connectors compatible to Neutrik® Speakon® ensure stable system performance. For larger setups the B1220 can be easily combined with the new EUROLIVE B1800X subwoofer.
