

BEHRINGER V-TONE GMX1200H Testata per chitarra

Produttore : Behringer

Cod.Art. : 2356

AMPLIFICATORE PER CHITARRA

Whether for practice, warm-up, rehearsal or recording, BEHRINGER's

V-TONE GMX1200H analog modeling amp head is a natural choice for

those who need their own arsenal of amps for optimal results no matter what the band brings along. With three amp models, three gain modes and three speaker simulations, all based on pure analog circuitry with no digital components, the GMX1200H gives you two fully independent modeling channels, each featuring 27 modeled sounds and supported by our revolutionary DYNAMIZER circuitry to deliver emulated tube warmth and responsiveness to your playing. BEHRINGER makes the GMX1200H complete with 2 x 60-Watt power amps

and a high-quality FX processor, auto-chromatic tuner and MIDI control. The GMX1200H works extremely well in tandem with the brand-new BG412V guitar cabinet as well as with the legendary BG guitar loudspeaker cabinets.
