Cod.Art. : 2436

STUDIO MODELER

Synchronizing a dream collection of classic effects has been a hit or miss (mostly miss) process. Now, the rhythmic possibilities are endless. Just tap a tempo to set the groove of your Tube Echo to a dotted eighth, let the Obi-Wah throb a quarter note while the Panned Phaser undulates a half note triplet. You'll find your ears reelin' in time and your toes doing that poly-rhythmic twitch that can only mean you've created another masterpiece. Ain't life grand? Extensive MIDI features, analog Bypass, expression pedal control and 99 Program memories give the most sophisticated effects junkie total control and limitless options. High-visibility displays let you know what's going on. Innovative tempo controls translate delay times and modulation rates from milliseconds or Hertz to BPM and back. With the ability to dial in anywhere from a 16th note triplet to a dotted whole note, you can simply tap a tempo or lock to MIDI Clock and dial in the perfect note rhythm to match any groove at any tempo.

Caratteristiche

- 16 modelli di effetti di modulazione (chorus, flanger, pan, phaser, ring modulator, rotating speaker, tremolo, vibrato)
- conversione digitale a 24 bit
