INTERFACCIA FIREWIRE PER ALESIS HD24

At Alesis, "computer" isn't a dirty word. Far from it, we think they're awesome for editing, managing, and mixing audio. That's why the HD24XR and HD24 both have a built-in Ethernet port for easy transfer. That's also why we made the ADAT HD24 FirePort — for pros who need even faster speeds. Plug an ADAT/FST-formatted drive into the hot-swappable FirePort dock, fire up (no pun intended) the FST/Connect software, and you've got a blazing 400Mb/sec FireWire connection between the stable, affordable tracking of our HD recorders and the editing power of your computer. The ADAT HD24 FirePort 1394. Your music where you want it, when you want it.

Caratteristiche

- Compatible with HD24 and HD24XR drives
- Hot-swappable docking station with standard IEEE 1394 FireWire interface
- Up to 400Mb/second FireWire audio transfer from ADAT/FST-formatted drives to computer and back
- FST/Connect software included for easy audio transfer and file management, including create/copy/delete on target drive
- Convenient desktop design with inline switching power supply
