

ALTO Macro 830

Cod.Art. : 2540

FINALE DI POTENZA

The Macro 830 Professional Power Amplifier is a great choice for applications requiring excellent frequency response, superior sound quality, high fidelity and low noise power. This solid, durable amplifier also features switchable output power (serial, stereo and bridged) and a sophisticated protection circuit. The advanced design of the Macro 830 makes it perfect for critical power amplification needs.

Caratteristiche

- Potenza EIAJ: 2 x 263 W su 8 Ohm - 2 x 488 W su 4 Ohm - 2 x 797 W su 2 Ohm - 1 x 1471 W ponte mono a 4 Ohm
- Input matching allows connection with any amplifier.
- Excellent frequency response and sound quality
- High fidelity and low noise
- The input is XLR-balanced and uses a 6.3 socket for better matching.
- The output power can be switched between serial, stereo and bridged.
- Low noise fan for efficient cooling. When the temperature rises, the fan automatically switches to high-speed. It rotates at normal speed at other times to reduce power consumption.
- While on, the Clip Limit function keeps a fixed output. When the output exceeds the maximum of the amp, this changes to protect its circuits. While off, there is no such limit.
- Indicator for the output balance, as well as status indicator of SIG and CLIP. When there is a signal, the SIG light is on. If anything abnormal happens to the circuits, the CLIP light will illuminate.
- Stylish white aluminum panels with acrylic accents.
