

CREAMWARE 14 DSP Booster - Scheda espansiva per moduli SCOPE

Produttore : Creamware
Cod.Art. : 2798

SCHEDA ESPANSIVA PER MODULI SCOPE

With a SCOPE Booster Board, you add the unbelievable power of 14(!) high-performance DSPs to your system. Thanks to the advanced S/TDM bus, the transfer of audio signals between stacked DSP cards does not rely upon the PCI bus. The addition of a Booster Board thus produces the same increase in overall system performance as would occur if the primary card itself suddenly had the same number of additional DSPs!

Prezzo : €1.479,00 IVA inclusa (€1.212,30 esclusa IVA)
