VIRTUAL INSTRUMENT

Ultimate Sample Experience

SampleTank® 2 is the ultimate sample workstation. For the first time in a sample-based instrument, 3 synth engines can be switched on the fly to provide more sound flexibility than ever before: traditional Resampling (the conventional method of playback most samplers use), Pitch-Shift/Time-Stretch and our all new STRETCH™ engine. STRETCH™ (Sampletank® Time REsynthesis TeCHnology) gives complete sonic control over the tempo, pitch and harmonics of samples. No more "chipmunk sounding" transposition, no more loops and phrases out of sync, no more limitations in musical expression.

You want MIDI control?

Every parameter in SampleTank® 2 is MIDI controllable for optimal interactive performance. From MIDI program change to full automation and total recall, SampleTank® 2 delivers the performance features musicians need the most.
