

M-AUDIO Ozonic + Digidesign Pro Tools M-Powered 7

M-AUDIO

Cod.Art. : 2965

CONTROLLER MIDI + SCHEDA AUDIO FIREWIRE + SOFTWARE

Ozonic combines a keyboard, control surface and 24-bit/96kHz FireWire audio interface in a completely integrated mobile audio/MIDI production and performance tool that streamlines making music with your computer—anywhere, anytime. Features like a professional synth-action keyboard with three assignable zones and 40 assignable MIDI controllers complete with transport buttons make it ideal for harnessing the full potential of your software studios. The built-in FireWire audio interface with mic/instrument preamps and headphone monitoring lets you work with loops and layer your own vocals, guitars and more. Dual output pairs with headphone A/B source monitoring is perfect for pre-listening, and cueing in a live performance. Ozonic is your answer to getting the most from your music software.
