MIXER PASSIVO CON INTERFACCIA FIREWIRE

Compact, affordable 8, 12 and 16 channel analog mixers with built-in multi-channel FireWire audio computer interface The MultiMix FireWire series are great sounding standalone mixers with an integrated 24-bit FireWire interface. Each input channel on the mixer (plus the stereo mix) is sent into your computer while a stereo output is received from the computer for monitoring. Essentially, it's like having a mixer and a 18-in/2-out interface in one compact package. And here's the clincher: the MultiMix FireWire is actually costs less than most professional FireWire interfaces alone! The MultiMix series mixers are the most compact, affordable high-quality mixers available with built-in 28-bit digital effects and 24-bit FireWire audio interface.

Caratteristiche
