SOFTWARE PER PRODUZIONE AUDIO PER MAC

There's a new fully-featured Piano Roll Window, similar to the type found in many sequencer programs. This allows you to edit the Melody or Soloist tracks with greater ease and precision.

The Guitar window is enhanced, and now supports Alternate Guitar tunings, including DADGAD, Drop D, Double Drop D, Open G and 11

others, including Nashville High Strung tunings! Guitar bends now show up in real-time on the guitar fretboard.

New 3, 4, and 5-part Jazz Harmonies are added with voicing in Fourths.

"Auto Endings" are added for styles that don't have endings, such as styles made from MIDI files. Synthesizer Patch file lists (.PAT files) can now be made easily by converting PowerTracks or Cakewalk patch lists.

"Jazz Chord-Symbol Graphics" (triangles for major, circles for diminished and a circle with a slash for half-diminished) are now supported. A new "Vocal Wizard" displays and transposes to the best

song keys for your vocal range.

Editing of the Audio Track is now non-destructive, so changes only become permanent if you save the file. The TC-Helicon Audio Harmonies have been enhanced with Vocal Pitch-Styles (automatic "Vibrato" and "Scooping") that can be added to the vocal harmony parts. Multiple sound cards are supported-you can now choose which

sound card to use.

Full Stereo or Mono support has been added for the Audio Track.

There are now on-screen VU meters to monitor the Audio Track.

Multiple lines of Lyrics are now supported on the Fake sheet and Printout. Chords and Lyrics can be displayed on separate lines on

EDIROL PG Music Band in a Box 2005 MAC

the Big Lyrics Window.
