Cod.Art. : 3376

EMULAZIONE DI AMPLIFICATORI/EFFETTI SOFTWARE PER CHITARRA

Questa versione scontata "crossgrade" è utilizzabile solo dai possessori di almeno un qualsiasi software IK Multimedia correttamente registrato sul loro sito web, incluse le versioni in bundle con schede audio ed escluse le versioni "Free".

Upgrade per AmpliTube plug-in

Complete Guitar Amp modeling solution and Guitar Effects powerhouse. AmpliTube 2 offers everything needed to craft your own

signature guitar tones with 5 separate modules including Tuner, Stomp, Amp Head, Miked Cabinet, and Rack Effects, on 2 series/parallel guitar rigs. 14 Preamps and EQs, 7 Power Amps, 16 Cabinets, 6 Microphones, 21 Stomp Effects, and 11 Rack Effects make

AmpliTube 2 the most comprehensive guitar Amp and Effects Modeling plug-in to date.

Ultra accurate modeling of the most sought after guitar gear, with unique DSM™ technology.

Over 80 guitar gear emulations, including popular amp models based

on Fender®, Vox®, Marshall®, Mesa Boogie®, THD®, Supro®, and more.

Stomp Box effects modeled after rare vintage gear including models based on Arbiter® FuzzFace®, Ibanez® Tube Screamer®, MXR® Dynacomp™, MXR® Phase100™, Electro Harmonix® Memory Man™ and more,

with AmpliTube's unique DSM™ (Dynamic Saturation Modeling) technology.

IK MULTIMEDIA AmpliTube 2 - Crossgrade

Mix and match amp components to build your own custom amp within

20,000 amp combinations.

Only AmpliTube 2 offers each individual guitar amp component modeled separately, allowing you to freely create a staggering 20,000 amp combinations! This means you can mix and match Preamps,

EQs, Power Amps and Cabinets of the most famous guitar amps of all

time, to make completely new custom hybrid amp creations and get your own, truly personal sound.

Easy to use, with hundreds of presets ready to go.

Thanks to its interface neatly organized the same way a guitar rig is laid out, AmpliTube 2 has a more natural organization and feel than many other other amp-simulation plug-ins in its category. No parameter is ever more than 2 clicks away. In addition, right out of the box, there are over 400 different programmed guitar Amp and Effects preset combinations covering virtually any famous signature guitar tone you may dream of.
