

## SM PRO AUDIO MC04

Cod.Art. : 3413

### MICROFONO DA STUDIO A NASTRO

This superior ribbon microphone is designed for use in contemporary, state of the art studios, yet offers the unique natural sound previously only available on exclusive classic large ribbon mics of the past.

Perfect for recording studio vocals, acoustic instruments, strings, horns, orchestras and choral groups, ambient sounds, and many other live sound applications, the MC04 is both Powerful and versatile. Featuring that classic ribbon sound, the MC04 meets the stringent requirements of even the most demanding digital recording and live broadcasting applications.

Ribbon microphones offer exceptional detail and transient response due to their extreme sensitivity to moving air pressure. Traditionally ribbon microphones have been used in studio applications for voice, classical, and choir recordings. Audio engineers are now finding that not only are ribbons well suited to these applications but are getting great results on electric guitars, dobros, and virtually all modern day instrument recordings.

### Caratteristiche

- Unparalleled sound of a classic ribbon (velocity) mic
- Low tension 2-inch long, 2 micron thick aluminium ribbon
- Smooth natural extended low and high ends
- Fast accurate transient response
- Stunning realism

## SM PRO AUDIO MC04

- Max SPL: 165dB SPL
- Figure 8 directional pattern
- Sensitivity: -56.5dB(0dB=1V/Pa)
- Frequency Response:
  - 20 to 18,000Hz (+/-3dB)
  - Impedance: <math>\leq 600</math> Ohms
- Equivalent noise level to IEC 268-4 (Aweighted):  
18dB
- Net weight: 1230g
- Contenuto confezione:
  - SM MC04 ribbon microphone
  - Light weight soft padded carry case for protection for your microphone
