

## FOCUSRITE ISA 220 - Processore Multifunzione

Focusrite®

Cod.Art. : 3562

### PROCESSORE MULTIFUNZIONE

The ISA 220 Session Pack provides all you need to record your session with precision and Focusrite sonic performance. It features many of the original circuits of the flagship ISA 430 Producer Pack along with some new features of its own. It also features the same digital option as the ISA 430, providing you with a high quality digital route direct from the 220 into your digital recording system.

### Caratteristiche

- Precision VU metering of input level or compressor gain reduction (switched)
- 16 LED Digital Output meters for both internal and external inputs
- Classic Focusrite transformer based Mic pre
- Switched High and Low pass filter controls
- Switched High and Low shelving filter frequency controls
- Optional Stereo A/D – 24 bit 96 KHz Delta Sigma converter running at 128kHz oversampling: dithers down to 20- or 16-bit
- Proprietary Focusrite discrete Class A VCA Compressor side chain design for lower distortion and Noise performance
- Illuminated push button for switching the compressor between pre and post EQ
- New Blend feature for adding dynamics into the compressed signal path
- New De-esser design based on optical technology for lower distortion and transparency
- 'De-esser Listen' for precise control over sibilance

## FOCUSRITE ISA 220 - Processore Multifunzione

- Frequency adaptive limiter to avoid critical digital overs

### Specifiche

- Inst. Hi Z I/P
- Noise: -96dBu
- THD: 0.003% with 0dBu
- Mic I/P
- Noise: 123dB EIN with 150 Ohm input resistance at 60dB of gain
- THD: 0.0008%
- Compressor
- Threshold Range: -28dB to +12dB
- Ratio: 1.5:1 to 10:1
- Slope: Soft knee
- Attack: 500ms to 25ms
- Release: 100ms to 4s, variable or auto (program dependent)
- De-Esser
- Threshold Range: 22dB
- Frequency Range: 2k2 to 9k2
- Ratio at Centre Frequency: 2:1
- Limiter
- Threshold Range: 20dBu
- Ratio: infinite (Brick Wall)
- Attack: Frequency dependent
