

BEHRINGER BX4410 Ultrabass Amplificatore per basso

Produttore : Behringer

Cod.Art. : 3579

AMPLIFICATORE COMBO PER BASSO 450WATT

Wait till you hear this bass workstation in action! We're talking big sound here, but not at the expense of definition. Remember, power is nothing without control and that is why we have included our patented* Dynamizer technology as well.

Powerful and packed with features, this truly affordable 450-Watt bass workstation with a front-ported bass cabinet has 4 original BUGERA™ 10" Classic Tone speakers and a switchable 1", custom-made horn tweeter. Our patented* Dynamizer technology gives you the ultimate punch, and the switchable Ultrabass subharmonics processor delivers stunning low-end power. There is a dedicated 5-band EQ with Deep, Bright and Shape functions for creative sound shaping. A musical opto-limiter assures problem-free, high-volume levels without distortion, and you also get a vintage-style VU meter for precise signal level control. The connectivity options include 3 speaker outputs on ¼" jack and professional speaker connectors (compatible with Neutrik® Speakon®). A dual footswitch for Ultrabass and Shape functions is included.

Quadra-powered inspiration from the bass workstation of tomorrow!

Prezzo : €499,00 IVA inclusa (€409,02 esclusa IVA)
