

## LINE6 LD175 1x15 with Horn Amplificatore 175W per Basso

Cod.Art. : 3726

### AMPLIFICATORE PER BASSO

The first ever line of bass amps from Line 6, LowDown™ delivers an incredible array of dialed-in, stage-perfected bass tones. While most bass combos focus on volume and clean tone, LowDown amps offer

five must-have effects and five killer bass amp models, that cover everything from funk to classic rock and beyond. Plus, the oversized, high-speed power amp has incredible articulation and bottom end punch that's ideal for live or studio work. Finally, there's a line of bass combos that give you great tone, performance, and flexibility all at an incredible price. LowDown™ delivers five carefully crafted amp models that can take you from modern punch to a thunderous, full-on assault! Each model automatically dials up a great sound that you can change to your liking and save into a preset using the channel memories on the front panel.

**Clean** - Inspired by\* the Eden Traveler, this model is all about clean, funk and fusion bass tone. It'll give you all the warm lows and punchy highs you need.

**R & B** - Inspired by\* a 1968 B-15 Flip Top, this model is a tribute to those late 60's and early 70's clean fat bass tones. It is the kind of tone you here on most Motown recordings, as played by a pioneering young James Jamerson.

**Rock** - This model is inspired by\* the '74 Ampeg® SVT®. This workhorse has appeared on innumerable recordings and arena stages

worldwide. And now all the tone of the 300-pound behemoth 8X10 and

head is available in your combo!

**Brit** - Based on a '68 Marshall® Super Bass, this model delivers the kind of overdriven bass sound brought to us by late '60's British rock pioneers like Cream and The Who.

## LINE6 LD175 1x15 with Horn Amplificatore 175W per Basso

Grind - As the name would suggest, this is for modern rock lovers, Alice in Chains to Mudvayne and Rage Against The Machine. Based on\* a distorted SansAmp PSA-1 into an SVT® in addition to a direct clean bass signal mixed in, this model gives you that angry, clear and punchy aggression that takes your sound to DEFCON 1.

But

that's not all...

Synth - Sitting at the back of the model knob is this secret weapon that turns LowDown into a '70s classic bass synth. From funk

to modern rock, this synth model delivers incredible tones and tracks every dynamic move you make with ease!
