

E-MU Modern Symphonic Orchestra

Produttore : E-MU

Cod.Art. : 3869

VST VIRTUAL INSTRUMENT

E-MU's Modern Symphonic Orchestra offers a comprehensive collection of over 10GB of the finest string, brass, woodwind and percussion samples (5 DVDs) - all meticulously sampled and programmed for just the right expressiveness in each recorded note to convey a truly realistic feel. Together with the included Overture 4 SE notation software, E-MU's Modern Symphonic Orchestra offers a total "plug-and-play" soundset for your Emulator X and Proteus X that lets you dial in the perfect orchestral sound every time. The library has been set up so that the instrumental sounds of the orchestra are laid out based on a live performance setup from the Baroque era. While there are many ways to set up an orchestra on stage, in working with orchestral samples, this pre-panned Baroque-style setup works the best to give you the most realistic sound possible. Programmed specifically for the powerful Emulator X/Proteus X sound engine, each of the Modern Symphonic Orchestra's presets is mapped to the MIDI real-time controllers for enhanced expression. The pitch wheel and modulation wheel, and other continuous controllers create various performance effects such as: bend-up/ down, voice switching, chorus, or layer crossfade. Many presets in Modern Symphonic Orchestra include multiple voices for each note. Depending on the preset, when you play a note on your controller, several factors determine what voice plays, including: modulation wheel position, note velocity, keyswitch, cycled or random voice switching. The Modern Symphonic Orchestra introduces the concept of Flex (or "flexible") Presets. Flex presets are multi-voice, multi-sample presets that automatically or manually switch voices to realistically emulate a performing musician. The flex preset control keys allow you to choose between different up/down bowing patterns for strings, and various tonguing and articulation techniques for woodwind and brass.

E-MU Modern Symphonic Orchestra

Ascolta la demo in Mp3: - -

Disco 1

- 1st Violins 10 violins on the far left.
- 2nd Violins 10 violins to the left of the center.
