

VOX Valvetronix AD60VT Combo Digitale Valvolare 60W RMS

Cod.Art. : 3948

AMPLIFICATORE VALVOLARE DIGITALE 60W

The AD60VT 60 watt combo brings together classic VOX tone with the versatility of a preamp section utilizing Korg's REMS (Resonant structure and Electronic circuit Modeling System) in a compact package. It offers all of the amazing sounds and features for which Valvetronix has been critically acclaimed, and includes the Valve Reactor power amp section that recreates classic tube power amp response. Valve Reactor does this by changing parameters, including class of operation (class A or A/B) and negative feedback settings, for each modeled amp. This patented design utilizes a tube power amp with an output transformer electronically coupled to a solid-state power circuit in such a way that the relationship between the output tubes, output transformer, and speakers is unaltered.

Caratteristiche

- AMP MODELS: 16 types
- EFFECTS: 21 types (Drive: 10 types, Modulation: 5 types, Delay: 3 types, Reverb: 3 types)
- PROGRAMS: 32 (8 Bank x 4 Channel)
- IN/OUTPUTS: 2 x Guitar Input (High, Low), Loop Return, 1 x Headphone, Line Out, External
- Speaker Out 1 x Foot Controller
- SPEAKER: 1x12" Custom-voiced Celestion
- POWER OUTPUT: 60W RMS@8ohm
- TUNER: Auto Chromatic Tuner [Measurement range: 27.5 Hz-2,093 Hz (A0-C7), Calib. A=438-445 Hz]
- DIMENSIONS: 530(W) x 267(D) x 559(H) mm /20.87"(W) x 10.51"(D) x 22"(H)
