

FOCUSRITE AD/DA ADAT Converter per OCTOPRE LE

Focusrite®

Cod.Art. : 4051

ESPANSIONE ADAT PER OCTOPRE LE

The OctoPre LE's optional CODEC board features both an ADC and a DAC, transmitting and accepting digital audio in ADAT (lightpipe) format. This allows quality digital conversion of all eight input channels within the unit before transmitting directly to the DAW (interface or soundcard) or other recording medium. Additionally, the DAC means that a digital output of a DAW (interface or soundcard) can be connected directly to the unit for monitoring purposes; all eight channels can be converted and fed to the Line 1/4" jack outputs on the rear panel, or just 1-4/5-8 as required. Digital audio can be transmitted or received at either 44.1 or 48kHz sample rates (selected on the front panel) and 24-bit resolution.
