

MARSHALL Valvestate AVT100X

Marshall
AMPLIFICATION

Cod.Art. : 4068

AMPLIFICATORE 100 WATT VALVOLARE PER CHITARRA

Marshall's AVTX line of amplifiers is the culmination of a decade's worth of evolution and innovation since the birth of the original Valvestate. All models now feature a new contemporary look and all AVT50X, AVT100X, and AVT150X models include automatic variable speed fans, ensuring their place as the market leader. The AVT100X heralds a whole new era of Marshall Valvestate. In addition to housing 16 adjustable DFX, this combo has three channels, each one voiced to give the broadest possible range of tones. Clean: From the cleanest clean to a natural, valve-induced, bluesy crunch and anywhere in-between. A Bright switch enhances high-end definition at low Gain settings. Overdrive 1: Takes you from the dynamic ranch of a 1959 'Plexi' to the larger-than-life crunch of a cranked JCM800. A Scoop switch reconfigures the EQ to give you that classic thrash sound of the '80s. Overdrive 2: From the primal angst of a hot-rodded JCM800 to extreme gain. Hit the Scoop switch to produce the brutal, bone-crushing slam of modern ('nu') metal. The 16 DFX are adjusted by the following controls: DFX Mix, DFX Adjust, and DFX Select. A Parallel FX Loop, complete with Mix control, is also included for added flexibility. The supplied 4-way LED foot controller allows you to switch the DFX on/off. Other features include a Headphone jack and a Speaker Emulated Line Out.

Caratteristiche

- Output (RMS): 100 watts
- Impedance: 8 ohms

MARSHALL Valvestate AVT100X

- Speaker: 1 x 12 in.
- Channels: 3
