

## YAMAHA GO44

Produttore : Yamaha

Cod.Art. : 4300

### INTERFACCIA AUDIO PROFESSIONALE FIREWIRE

The Yamaha GO44 is a mobile audio solution that features high quality mic preamps and world-class MIDI and audio recording software enabling professional quality recording to a computer in a compact package that can be carried and used virtually anyway.

The GO44 delivers 2 audio I/Os by simple one-cable FireWire (IEEE1394) connection to a computer. Analog input/output is handled by two line terminals (6,3 mm phone jack) on the back panel. Digital input/output with S/P DIF coaxial connectors and MIDI IN/OUT are provided by a special cable attached to the device on the back panel.

The GO44 boasts up to 24-bit/192kHz resolution on the analog inputs/outputs and 24-bit/96kHz on the digital I/O. This pro-level quality makes the GO44 perfect for any type of recording, and allows you to capture the full details and nuances of the original source.

#### Caratteristiche
