CD RECORDER PROFESSIONALE

CD-RW900 is a rugged CD Recorder for high-quality audio recording on CD-R and CD-RW media. Analogue material can be recorded via RCA

connectors with two independent input level controls for the left and right channels on the front panel. For digital signals, there are optical as well as coaxial SPDIF inputs and a digital volume control accessible over the menu. Continuous audio streams can be divided into single tracks either level-controlled or manually. It is also possible to fade in or fade out songs during recording and to enter information like track titles or artist names (CD Text) over an externally connected computer keyboard. The CD-RW900 is also great on playback of audio and MP3 CDs. You can change pitch

and/or key of your audio material, play all or single tracks, play tracks in random or programmed order or repeat a whole CD or A-B sections only. With a broad feature set, high-quality components and rugged construction, the CD-RW900 is ideal for home recording, studio, theatre, concert sound or permanent installation.
