MICROFONO SUPERCARDIOIDE PER VOCE

The AKG CCS (Crystal Clear Sound) microphones offer great value for your money. D 88 S -- Here comes the boss. Lead vocalists simply need a better microphone that looks as cool as it sounds. A supercardioid polar pattern makes the voice cut through the mix more easily. Its heavy-duty metal body with rugged wire mesh cap feels great to hold and will take some tough handling. Young musicians, Karaoke singers, audio hobbyists, solo entertainers are all looking for good, reliable microphones at affordable prices. Many of the microphones on the market do not provide the desired quality. AKG Acoustics closes the gap between low-cost/low-quality offerings and professional microphones with an attractive line of microphones for a large range of requirements and applications. The CCS Series microphones do not only provide crystal-clear sound, but come in professional cases showing all important specs and features at a glance.
