

## MARKBASS CL300 Classic 300

Cod.Art. : 5405

### TESTATA VALVOLARE PER BASSO 300W RMS

Here's a beautiful example of how old and new technology can—and should—work together. The heart of the Classic 300 is its tubes. The brain is its microprocessor! Ten tubes give you the warmth and fullness of the great old amps that are now aging or retired. But times have changed. Don't you think it's about time you got an amp that took care of itself? The Classic's futuristic onboard microprocessor re-biases your tubes every time you start up the amp, allows you to customize your bias adjustments, and tells you if and when any tubes need to be replaced! Tube amps used to be finicky and unreliable. Now you won't have any nasty surprises on the gig, and you'll know exactly when and how your tubes need to be serviced. This handsome head puts out a loud 300 watts of power.
