

## MARKBASS MiniMark

Cod.Art. : 5410

### AMPLIFICATORE COMBO ULTRA LEGGERO PER BASSO 300W RMS

Last year Markbass welcomed a new baby combo to the family: the Micromark. He sure is cute (and loud)... but his big brother Minimark is already running down the street and getting into trouble! This precocious little combo sports two 6" custom B&C neodymium woofers and an onboard piezo tweeter, and cranks out an incredible 250 watts of power. With its astonishing volume, it's a brilliant choice for rehearsing, practicing and teaching. And yes, you can use it on gigs! The compact amp section includes gain, master, VLE and VPF filters, aux in, headphone out, speaker on/off switch and balanced XLR line out. Never has it been so easy to take public transport to a gig. In fact, take your gig anywhere you can plug in!

#### Caratteristiche principali

- Speaker size (inches) 2x6"
- Tweeter piezo tweeter
- Cab powerhandling (aes standard) 300w rms
- Crossover frequency 3.5 khz
- Frequency response 59hz to 18khz
- Sensitivity db spl 101
- Impedance 8 ohm
- Reflex rear
- Weight kg. 9,4
