

## VESTAX VMC004XL Silver

Cod.Art. : 5502

### MIXER PROFESSIONALE PER DJ

The VMC -004 XL is Vestax's first non 19" 4 channel entry level mixer with high end features. This mixer is just under 13" and 6 rack spaces. This is Vestax's most inexpensive four channel mixer ever made. This amazing entry level mixer comes with enough features to ensure that any beginner DJ has more than enough room to grow. Suitable for all musical styles, including scratch, the VESTAX VMC-004 XL comes with 4 channels each with a 3 band ISOLATOR

and one of the smoothest crossfaders available. Vestax's industry knowledge and technology has brought you a new compact series, the

VMC. Wherever the location, whether a bar, club, bedroom or restaurant the VMC is capable of all. Small, compact, yet fully functional to compete with high-end mixers is the VMC. Whether your

sound source is a turntable, CD, DVD, HD and even memory audio, the

VMC was produced to handle all, with 4 independent program channels, 2 master outputs, so whether this piece is your master mixer or even as a second mixer, the VESTAX VMC-004 XL will do it's

job! Each channel has a 5 segment LED meter which allows you to adjust each channel to match the exact level of the main channel; this allows you to transfer from one channel to another hearing a change in the music & not a change in volume. This feature is critical if you plan to make mix CD's. The crossfader has 2 curve settings. One is a sharp slope, the other is normal slope. When the switch is in the LEFT position, the crossfader will have a long curve fading in & out smoothly. This is perfect for mixing house, techno & trance. If the switch is in the RIGHT position, the fader will have a sharp curve, allowing for quick punch-ins which is

## VESTAX VMC004XL Silver

ideal for hip-hop & Drum & Bass. The Vestax VMC-004 XL also has one of the most advance headphone monitoring systems in the world. The mixer has CUE SELECT as well as CUE/MASTER mix knob which allows you to mix in the headphones by selecting any of the channels and mixing it in with any level of the master.
