

LINE6 POD X3 Live

Cod.Art. : 5746

MULTIEFFETTO PER CHITARRA / BASSO /
VOCE

The stage-ready POD® X3 Live represents the true evolution of the now-classic POD® xt Live guitar amp modeler, with an expanded array of 78 guitar amps, from high-wattage heavyweights to boutique beauties and vintage treasures. Guitar amp models are just the beginning: With 24 guitar cabs, 98 stompbox and studio effects, 28 bass amps, 22 bass cabs and six vocal preamps - POD X3 Live comes complete with the all-around sonic firepower of a top-tier major-label studio, ready to tackle guitar, bass vocals and beyond. What's more, its larger LCD and smart new editing workflow pages make it easier than ever to find, tweak and save tones. POD X3 Live also offers powerful new dual tone modeling and routing options. Split your single-input guitar or bass signal through two different amp and effect chains simultaneously to create gorgeous new hybrids, or use its dual inputs to individually process two instruments—a microphone and a guitar, for example—at the same time. Computer recording enthusiasts will want to exploit the USB 2.0 connectivity provided by POD X3 Live for multi-channel recording as well as its S/PDIF Stereo Digital Audio Output for sending an ultra-clean signal to their DAW. In addition to stereo 1/4-inch line outputs (with Amp/Line pad switch) POD X3 Live boasts stereo XLR balanced line outputs for the best possible live signal. When you hit the stage with the sleek, rugged brushed-aluminum POD X3 Live (with its racecar-inspired built-in expression pedal), you'll be outfitted with even more of the flexibility and timeless tones that have made POD the global standard for the discriminating guitarist.

LINE6 POD X3 Live

Visualizza la demo:

IN / OUT

- 1/4-inch Instrument Input (w/ Normal/Pad switch)
- XLR Microphone Input (w/ Trim Adjust)
- USB 2.0 for computer recording
