CD PLAYER PER DJ

Designed by DJs for DJs and drawing inspiration from Pioneer's industry standard CDJ-1000 series, this latest member of the world-famous CDJ family is fully geared up to serve the next generation of digital artists. The CDJ-400 allows DJs to play their MP3 collection off CD-R/RW discs as well as music from mass storage

USB devices, such as USB keys, external hard drives and portable media devices. The deck also features the world's first Scratch Jog Effects, with three creative scratch effects and an amazing new Loop Divide function. Virtually all of the button and slider functions can send MIDI data via USB output, making it possible for the decks to control DJ software and other applications, such as Pioneer DJS or Serato Scratch LIVE on a PC or MAC. The CDJ-400 deck

is a perfect partner for the DJM-400 mixer and together they provide the ultimate home party set-up.

Caratteristiche
