CASSA ATTIVA 600 WATT CON DSP

It doesn't matter if you need a PA system for a heavy metal band, a church or a one-man show. You want a speaker that sounds great at whisper level but can also level the house if needed. The state-of-the-art EUROLIVE B412DSP PA speaker system boasts 600

Watts that will simply blow you away. It holds a bi-amped 600-Watt engine which drives a high-efficiency 12" woofer for brutal punch and a 1.75" titanium driver for high-end resolution. The built-in mixer allows you to run the show without any extra equipment. But this animal also has a brain: a powerful 24-bit DSP controls the crossover, a dual compressor/limiter, phase and time corrections and even a noise gate. The intelligent dynamic EQ makes sure your system sounds perfect at any sound level.

Caratteristiche

- High-power 600-Watt 2-way PA sound reinforcement speaker system with integrated mixer for live and playback applications
- State-of-the-art 24-bit digital signal processor for ultimate system control:
- Digital crossover, phase and time correction for perfect driver alignment plus dual compressor/limiter for total system protection
- Digital noise gate, low-cut filter, 2-band EQ, dynamic Contour filter for ultimate sound reproduction
- 2 ULN Mic/Line inputs with individual volume controls and peak LEDs
- Extremely powerful 12" long-excursion driver provides incredibly deep bass and acoustic power
- State-of-the-art 1.75" titanium-diaphragm compression driver for exceptional, high-frequency reproduction
- Ultra-wide dispersion and large format exponential/conical horn with multi-cell aperture throat

BEHRINGER B412DSP Eurolive Cassa Attiva 600W con DSP

- Additional Line output enables linking of additional speaker systems
- Versatile trapezoidal enclosure design allows different positioning:
- Stand mounting with 35-mm pole socket
- Tilts on its side for use as a floor monitor
- Ergonomically shaped handles for easy carrying and setup
