SOLIDSTATE AUDIO RECORDER

The HD-R1 is a two-channel, single rack-mount recording and playback device created with the sound contractor in mind. Utilizing the highly reliable CompactFlash card, the HD-R1 records 44.1/48 kHz, 16/24-bit PCM or MP3 files. File transfer can be accomplished via Ethernet, USB, or a card reader. The ability to control the unit remotely is provided via RS-232, Parallel, and RJ45 100-Mbit Ethernet. To further enhance the HD-R1's feature set, mic preamps with 20-dB PAD and phantom power (rear-panel selectable) have been included. A variety of contractor-friendly I/O options, such as unbalanced RCA, balanced XLR and Euroblock, and SPDIF digital (coaxial and optical) are also available. And of course ... the HD-R1 offers traditional source device features like power-on play, front panel rotary input level controls, a headphone jack with level control, and a variety of playback modes.

Caratteristiche

- 1-U rack-mount solid-state audio recorder
- Uses popular, secure CompactFlash card as recording media
- USB host interface for USB flash cards
- Audio data formats: PCM (16-/24-bit), MP3
- Sampling rates supported: 44.1, 48KHz
- XLR balanced mic/line I/O with switchable 20-dB PAD
- Phantom power (switchable on rear panel, front LED indicator)
- Euroblock terminal I/O
- Unbalanced RCA I/O
- Rotary analogue input level controls on front panel
- SPDIF Digital I/O (coaxial and optical)

TASCAM HD-R1

- RJ-45 Ethernet interface (100-Mbit/s) for file transfer and control
- RS-232 interface for control
- D-sub 25-pin parallel remote control interface
- Direct Play via parallel interface
- Power-on play (start playback when power comes up)
- Headphones jack with level control on front panel
- Input Through and Auto Fade functions
- Input monitoring/mixing of live stereo input along with playback
- Play modes: Program, Folder, Shuffle, Interval, and more
