

DIGITECH Vocalist Live 2

Digitech
by HARMAN

Cod.Art. : 6428

ARMONIZZATORE + PROCESSORE DI EFFETTI PER CHITARRA E VOCE

Vocalist Live uses breakthrough musIQ™ technology to directly analyze the output of any electric or pre-amplified acoustic guitar (no special MIDI guitars or hex-outputs needed). Then it generates the correct vocal harmony. For example, if you're singing an A over the chords that are generally found in the key of G, Vocalist will harmonize with a C. But, if you then play an A major, Vocalist will shift to the C#...because like any good harmony singer, it listens to the guitar!

Caratteristiche

- 2-part vocal harmony with no programming — just sing, play and let Vocalist Live 2's groundbreaking MusIQ™ technology do the rest
- Selectable voicing: unison, 3rd, 5th-above or below your lead vocal
