

## TERRATEC Cinergy T USB XXS

Produttore : TerraTec

Cod.Art. : 6466

### RICEVITORE DVB-T

The Cinergy T USB XXS is the mobile DVB-T tuner in a compact size.

Just connect it to your USB 2.0 port, and the small stick receives television and radio via DVB-T. The receiver draws its power from the USB port—a separate power adapter is not required. Of course, a

remote control and an antenna are included. Ideal for watching TV on your laptop while on the go, but equally useful for at-home viewing on your desktop.

With TerraTec Home Cinema, powerful TV software for timeshifting TV

programs and digital recording with edit function is included in the scope of delivery. Your computer promptly comes out of standby or hibernation mode when needed and then goes back into hibernation

once the recording is completed. The integrated electronic program guide assists you in programming. Additional innovations, such as automatic adjustment of the aspect ratio, recording of Dolby Digital, video text and subtitles, individually adjustable lists of favourites (genre, location) as well as picture-in-picture and network streaming make it easy and convenient to experience the many benefits of watching TV on your computer. And all of the functions can be easily configured via remote control, keyboard or mouse.

### Caratteristiche
