

DIGITECH RP50

Cod.Art. : 6478

MULTIEFFETTO PER CHITARRA

Meet the incredibly feature-packed RP50. Our engineers built the RP50 with the great tone and effects you expect from DigiTech®, including award-winning amp, cabinet and pick-up modeling and an arsenal of studio-quality effects. They didn't skimp on the processing either. The RP50 uses our AudioDNA™ DSP chip to ensure that both modeling and effects are world-class. Plus 24-bit A/D/A conversion so that no frequency response is lost between inputs and outputs. And when we weren't looking, our engineers even snuck in a drum machine with 30 patterns and an easy-to-use 13-LED array tuner. Then we made sure that the RP50's user interface was so simple a drummer could operate it (well most drummers, anyway).

Caratteristiche

- The built-in Audio DNA super-chip delivers 11 Award Winning Amp Models
- 20 studio-quality effects, up to 8 at a time
- Built-in drum machine with 30 patterns
- 40 User/40 Factory presets
