

IK MULTIMEDIA Miroslav Philharmonik - Crossgrade

IK Multimedia. Musicians First.

Cod.Art. : 6508

VIRTUAL INSTRUMENT

Questa versione scontata "crossgrade" è utilizzabile solo dai possessori di almeno un qualsiasi software IK Multimedia correttamente registrato sul loro sito web, incluse le versioni in bundle con schede audio ed escluse le versioni "Free".

A workstation focused on orchestral instruments, ensembles and choirs

Philharmonik is a powerful integrated Orchestral Workstation combining the legendary Miroslav Orchestral and Choir sample collection masterpieces with a dedicated plug-in instrument specifically tailored toward classical sounds and arrangements. Includes the legendary Miroslav Vitous orchestra and choir collections

Miroslav orchestral samples are some of the most playable and inspiring sounds ever produced for symphonic arrangements and composition. They've marked the atmosphere of hundreds of movies and productions and have become the tool of choice for many Oscar winning composers.

True acoustic placement within the Dvorák Symphony Hall
For incredible acoustic realism, the string, brass and woodwind sections have been captured in the proper acoustic orchestral positions in one of the most famous symphony halls in the world, the Dvorák Symphony Hall in Prague. No need for simulation with panning, just call up the elements of the orchestra and instantly sound like a symphony. These sounds have a texture, warmth, and beauty that is unique in the sample world.

Caratteristiche

- 16 part multi-timbral sample-based orchestral workstation.

IK MULTIMEDIA Miroslav Philharmonik - Crossgrade

- 20 Classic DSP effects
- 4 insert effects per instrument.
